CORE COMPETENCY IN GI ENDOSCOPY: COLORECTAL CANCER 360° HANDS-ON TRAINING COURSE

 The Simulation and Practical Skills Center at the "Iuliu Hatieganu" University of Medicine and Pharmacy, 23 Gh. Marinescu Street Cluj-Napoca  February, 28-29, 2020

DEAR COLLEAGUES AND FRIENDS,

Colorectal cancer screening should be a major agenda item for national gastroenterology societies and the significance of early detection and removal of precancerous lesions through screening does not need to be underscored.

The demand for diagnostic and therapeutic endoscopy has been increasing annually in Romania and worldwide. However, sometimes it is challenging to learn the new interventional procedures, due to its long learning curve.

CRC 360 is offering the complete solution for Colorectal cancer (CRC) starting from early diagnosis, endoscopic treatment of early lesions as well as management of advanced lesions. The course will consist of two full days of state of the art lectures as well as three hands on training sessions parallel to meet the experts session .

Our course is intended for practicing gastroenterologists and for fellows in training with varying levels of training and experience. Our aim is to offer a focused and deliberate endoscopy practice in order to supply the attendees with practical skills to use, required core competencies and specific feedback, variables particularly important in the clinical practice.

Therefore it is our pleasure and honor to welcome you to this hands-on endoscopy course with the support of Roeya Training Center and World Endoscopy Organization.

Course directors,

Ofelia Mosteanu

Teodora Atena Pop
